Andeler Corporation Selects ePsolutions, Inc. To Power Back Office

AUSTIN, TX – November 13, 2008 – Today, ePsolutions, Inc., a leader in back office solutions for competitive energy resellers, announced the selection of their emPower software solution by Texas Retail Electric Provider, Andeler Corporation. After a thorough assessment of back office solutions, Andeler selected ePsolutions to assist with the wide range of requirements needed for supporting competitive retailers within the Texas market. As a part of the relationship, ePsolutions will be responsible for processing Andeler's customer data, including support for all EDI transaction sets and market support. Ultimately, emPower's superior functionality and ease of use won the Andeler Corporation over.

emPower is a comprehensive solution that automates and simplifies all critical functions of an energy resellers' back office. Key capabilities include automating new customer acquisition, billing and collections; streamlining customer care; providing self service capabilities for customers; completing market transactions in real-time; and easily scaling to support the needs of resellers as they expand to new market segments or offerings.

"As a new market participant in the highly competitive Texas retail market, it is essential to choose a reliable, robust back office provider. Extensive research was done when we were selecting a back office solution and we see the value in having one vendor for every aspect of our solution. We will need to process transactions such as customer enrollment, meter readings and historical usage quickly and seamlessly and we're assured this with ePsolutions' state-of-the-art software and high customer satisfaction", said Sam Holton, president and founder of Andeler Corporation. "It is also critical to stay abreast with regulatory changes and requirements within the Texas market and ePsolutions has the experience and market presence to provide this to us.

"ePsolutions is committed to being an industry leader in back office automation for postpaid, prepaid, commercial and residential energy resellers. We are pleased to be working with Andeler Corporation and to assist them in achieving their goals in a cost-effective and timely manner. We believe that our robust system gives our customers a significant competitive advantage in the marketplace by enabling them to offer superior service to their customers," said Steve Langerock, Chief Executive Officer, ePsolutions. "It's no surprise that we are becoming the back office solution of choice for Texas retail electric providers."

About Andeler, Inc.

Andeler was incorporated December 2001 and is committed to providing reliable and competitively priced supply of electricity and related services to the Texas market. Their mission is to provide apartment communities and businesses with the most dependable utility services at the lowest rates. Andeler brings the power of electric deregulation to apartment communities and businesses in one very lucrative and creative package.

About ePsolutions, Inc.

ePsolutions delivers the industry's most fully integrated, automated, and cost effective back office solution on the market for competitive energy resellers. Combining the comprehensive *emPower* software with a knowledgeable team of experts, ePsolutions helps resellers substantially lower operating costs and free up resources to support other aspects of the business. Founded in 2004 and serving clients throughout Texas, it is a privately-held company backed by Peninsula Capital Management, Inc., Toreador Resources Corporation (Nasdaq:TRGL) and private investors.
