Acacia Energy Selects ePsolutions, Inc. To Power Back Office

AUSTIN, TX – September 24, 2007 – ePsolutions, Inc., a leader in back office solutions for competitive energy resellers, today announced that Acacia Energy selected ePsolutions' emPower to automate all back office processes and support Acacia's entry into the commercial market.

emPower is a comprehensive solution that automates and simplifies all critical functions of an energy resellers' back office. Key capabilities include automating new customer acquisition, billing and collections; streamlining customer care; providing self service capabilities for customers; completing market transactions in real-time; and easily scaling to support the needs of resellers as they expand to new market segments or offerings.

"We went through an extensive review process and looked at multiple provider's products before selecting ePsolutions. Their product, emPower, won out because it is extremely robust, has comprehensive capabilities and would ultimately provide the highest value for the investment", shared Debbie Wernet, president and founder of Acacia Energy. "For our newly formed company, ePsolutions is also the ideal match because their team has very strong ties to ERCOT. Their knowledge of changing operational and regulatory requirements and their relationships within the Texas market will benefit us as we navigate through the complex process of entering the commercial market."

Acacia Power is scheduled for flight testing during the fourth quarter of 2007 and it is anticipated that the company will begin servicing the commercial market early in 2008.

"ePsolutions is committed to being the leader in back office automation for postpaid, prepaid and commercial energy resellers. We see a growing opportunity to bring emPower's advanced technology to address the needs of REP's servicing sophisticated commercial clients. Our team continues to deepen ties in the deregulated energy space and combines our experience with extensive market research and feedback from customers to drive continuous innovation in the emPower platform," said Matthew Gill, chief executive officer, ePsolutions. "The result is a comprehensive and flexible solution that can support the complex needs of commercial providers like Acacia Power as they serve this growing marketplace."

About ePsolutions, Inc.

ePsolutions delivers the industry's most fully integrated, automated, and cost effective back office solution on the market for competitive energy resellers. Combining the comprehensive *emPower* software with a knowledgeable team of experts, ePsolutions helps resellers substantially lower operating costs and free up resources to support other aspects of the business. Founded in 2004 and serving clients throughout Texas, it is a privately-held company backed by Peninsula Capital Management, Inc., Toreador Resources Corporation (Nasdaq:TRGL) and private investors.
